This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

+ *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
+ *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
+ *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
+ *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at `http://books.google.com/`

DIRECTIONS FOR THE USE OF THE CATALOGUE.

This Preliminary Catalogue is classed into the following divisions:—

(1.) THEOLOGY and PHILOSOPHY (Mental and Moral). Page 1.
(2.) HISTORY. (History proper; Biography; Travels.) Page 3.
(3.) POLITICS (including Law and Commerce). Page 27.
(4.) SCIENCES and ARTS. (Mathematical, Mechanical, and Physical Sciences; Natural History; the Art of Design; and the Mechanical Arts.) Page 28.
(5.) LITERATURE:—
i. POETRY and the DRAMA. Page 36.
ii. ESSAYS and LITERARY MISCELLANIES. Page 42.
iii. PROSE FICTION. Page 46.

The several works with which the Library opens in these classes, respectively, are entered, alphabetically, under the Authors' names. Anonymous works follow, in a separate alphabetical arrangement, according to their respective titles.

In searching for the book of a known author, on a clearly defined subject,—as, for example, a "History of England," by Hume; or a "Treatise on Galvanism," by Harris,—the readiest plan will be to turn to the name of such author in the body of the Catalogue—"Class II., HISTORY," in the one case, or "Class IV., SCIENCES," in the other. If the author be known, but the place of his book in a Classification of Subjects be doubtful, or, at all events, not obvious to the applicant, the "GENERAL TABLE OF AUTHORS" will instantly lead to it. If, again, a book on a particular

Digitized by Google

subject be wanted, and the authors who have treated of that subject be unknown to the searcher, the "GENERAL TABLE OF SUBJECTS" will best serve the purpose. If, in the last place, the "Life" of any person be sought for, and the name of the biographer be unknown, such biography will be found in "Class II., HISTORY," in its alphabetical place, under the name of the person who is the subject of it, as well as under the name of its author.

I have, for the sake of greater conciseness, omitted from the Tables, both of Authors and of Subjects, the entire section of "Prose Fiction." Ample information respecting books of this class will be afforded by the Catalogue itself.

It will greatly facilitate the quick receipt of books wished for, if every borrower will (first) make out a list of several works, taking care to specify literally the prefixed number and the name ("B 575. Allen," for example) in each case; and (secondly) *not* select *all* the books asked for from any one section of the Catalogue exclusively. The speedy return of all books borrowed, will also largely promote the good service and general convenience of the Public.

EDWARD EDWARDS,
Principal Librarian.

CHIEF LIBRARY, CAMP FIELD,
12th Nov., 1857.
